To Whom It May Concern

Mr. Saman Sanati

This letter supports Mr. Saman Sanati, who is applying for a graduate Program at your institute. He is a BSc student in our school at the University of Tehran in Mathematics and will graduate this year. I have known him for the past three years. He has attended two of my courses in 'differential equations' and 'dynamical systems' with high performances and excellent project reports. He is currently doing his BSc project under my supervision. Saman has a constructive attitude toward the application of mathematics in economics, industry, and engineering.

Mr. Sanati is talented and enthusiastic in learning and research. He is improving his English and is proficient enough to start a graduate course. I believe that Saman will be a successful researcher and hence recommend him for the appointment available in your institute. If you would like further elaboration, please feel free to contact me.

Yours Sincerely

Gholam Reza Rokni Lamouki
